Professional Summary:

Computer Science student with hands-on experience in software development, scripting, and version control using Git. Familiar with system architecture, Agile methodologies, and cloud-native technologies through academic project work. Eager to apply problem-solving and automation skills to support cloud infrastructure and DevOps operations in a fast-paced environment.

Professional Skills:

- **Introduction of Computer Programming:** Java, C/C++, JavaScript, Rest API, Bash/Shell Scripting
- **Web & Mobile Development:** HTML, CSS, PHP, Dart, Flutter
- **Database:** SQL, PostgreSQL, PgAdmin, SSMS, Relational Data Management
- **Cloud & Infrastructure:** AWS (Fundamentals), Microsoft Azure (Fundamentals), Infrastructure as Code (Terraform basics), Cloud-Native Technologies
- **System & Networking:** Linux, OS Fundamentals, Troubleshooting, Networking Concepts, Wireshark, Cisco Packet tracer.
- **DevOps & Tools:** Git/GitHub, CI/CD Concepts, Agile, Visual Studio, Log Analysis
- **Monitoring & Operations:** Infrastructure Monitoring, Incident Investigation, Deployment Validation

Academic Projects:

Personal Portfolio Website – Web Programming (CST8326)

February 2026

- Developed and deployed a multi-page website, simulating a real-world web application deployment workflow
- Implemented automated testing using Selenium to validate functionality, write test cases, and ensure reliable performance, mirroring CI/CD quality assurance practices
- Used JavaScript to improve interactivity and dynamic functionality across pages
- Technologies: *HTML, CSS, JavaScript, Selenium*

Cloud-Hosted Portfolio Website – AWS Project (Self Learning)

May 2026

- Deployed a static Portfolio website on AWS S3 with public hosting configuration
- Launched and connected to an EC2 instance via SSH on Amazon Linux
- Managed project files and deployment scripts using Git/GitHub
- Technologies: *AWS S3, EC2, Linux, SSH, HTML, CSS, JavaScript, Git*

Vehicle Management App – Object-Oriented Programming (CST8284)

March 2026

- Built a Java application using OOP principles to manage and organize structured data reliably and efficiently
- Implemented error handling and exception management to improve application stability and reliability, reflecting operational resilience thinking
- Designed a scalable code structure using inheritance and abstract classes to support future enhancements
- Technologies: *Java, OOP, Event Handling, Exception Handling*

Snack Pack Nutrition Analyzer – Computer Programming (CST8116)

October 2025

- Designed a console-based application with strong input validation, structured logic, and clean output, emphasizing code reliability and maintainability
- Applied systematic troubleshooting and debugging during development to ensure accurate results
- Technologies: *Java, Console I/O, OOP Fundamentals*

Work Experience:

Volunteer, Algonquin College

May 2026 - Present

- Collaborated with staff and fellow volunteers to deliver a smooth and welcoming onboarding experience for incoming students
- Communicated clearly and inclusively with diverse students, providing guidance and support during campus orientation events
- Demonstrated reliability and accountability by consistently supporting team operations in a fast-paced environment

Front Desk, Greeter. Mr. Lube. Ottawa, ON

Oct 2025 - Jan 2026

- Delivered professional and trustworthy customer service, ensuring every client felt informed and valued
- Followed established operational procedures for organizing equipment and maintaining workplace safety, demonstrating attention to detail and process adherence
- Adapted quickly to a fast-paced environment while maintaining accuracy and a positive client experience

Library Assistant, K.N Patel High School, India

2022-2024

- Managed front desk operations and maintained well-organized, accurate records serving a diverse student and visitor community
- Built positive relationships with patrons by providing helpful, respectful, and inclusive service
- Took initiative in organizing community storytelling sessions, promoting engagement and a welcoming environment

Education:

Diploma in Computer Programming,

Algonquin College-Ottawa, Canada

September 2025-Present

Relevant coursework: Programming Fundamentals, Web Development, Networking, Database Management, Operating System.

Certification & Training

- **AWS Certified Solutions Architect Associate** Ongoing
Self-Learning, Canada
- **Google Networking cloud: Network Architect** April 2026
Self-Learning, Canada
- **Peer Tutoring** September 2022
India
